

Accurate Compliance Data Synced Across Every System

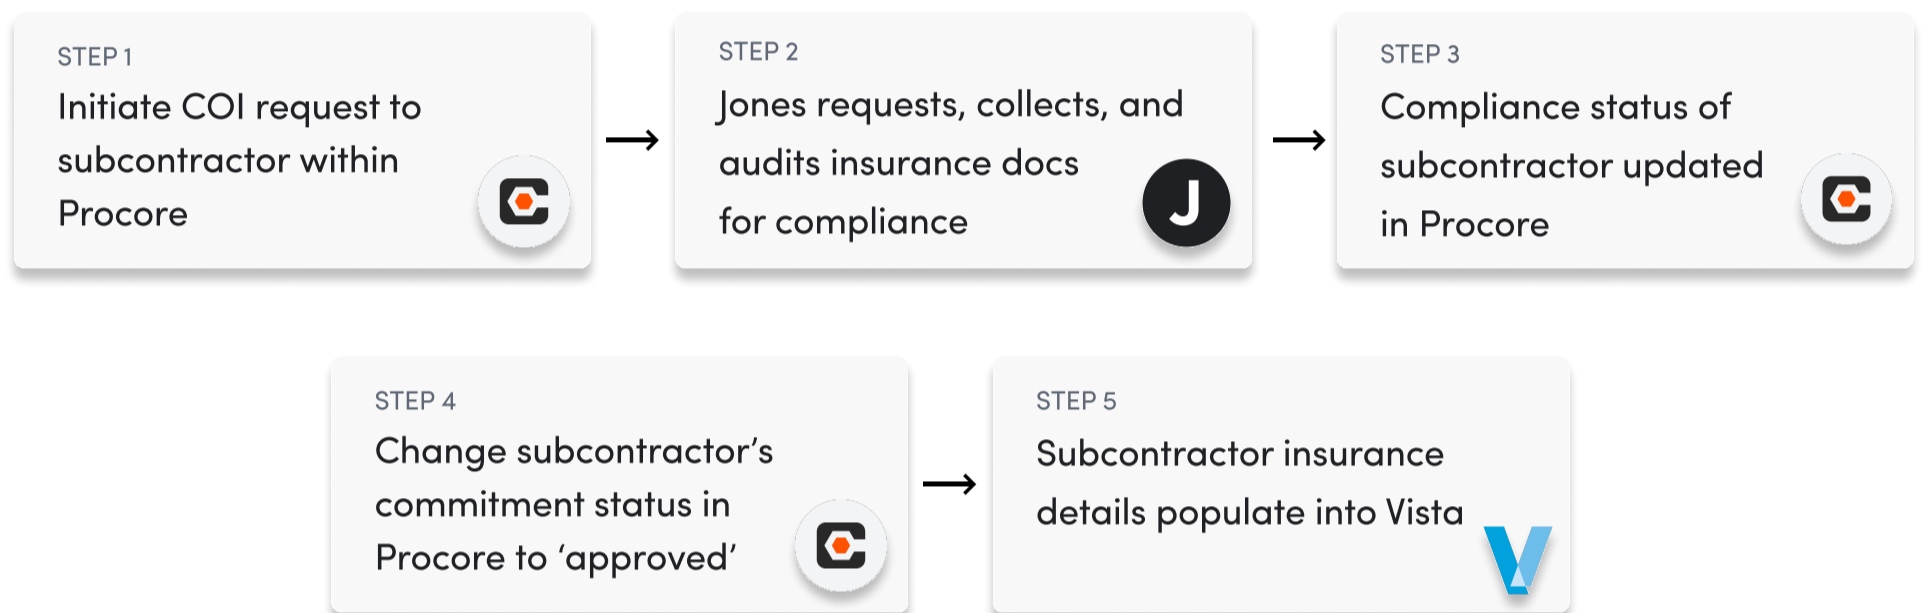

All the subcontractor compliance data your teams need, available within your Procore and Vista Workflows.

Why construction companies add Jones to their tech stack

- ✓ A single source of truth for all subcontractor compliance data, accessible by every department in their Procore and Vista Accounts
- ✓ Reduce time spent switching between Procore, compliance software, and Vista to manually update compliance data
- ✓ Simplified experience and timely payments for subcontractors and vendors

How Jones enriches Procore and Vista with compliance data

Vista + JONES Insurance data from

Commitment ID from Procore

Subcontractor description

View the same real-time compliance statuses within Procore and Vista

Auto-populate insurance data into Vista so payment can be contingent upon compliance

What Jones Does

- Collect and view insurance documents directly within Procore
- Review for compliance (two-phase audit process, combining OCR technology and double verification by team of insurance professionals)
- Resolve gaps in coverage
- Extract insurance requirements
- Monitor expirations/auto-renew
- Schedule reports on compliance rates

"Integrating Jones with Procore and our accounting software, Viewpoint Vista has completely changed our internal workflow for the better. We no longer have to manually update a subcontractor's compliance status for every project, it now updates automatically every night. This has freed up a significant amount of staff time, and we're able to keep subcontractors in compliance resulting in getting them paid faster."

- Danielle Keane, Senior Contract Administrator

Holt Construction
New York based construction management and general contracting firm
